

PGL Group 1 photos

DID YOU KNOW?

Most caterpillars have 12 eyes!
They don't see light, but they can see.
Caterpillars measure 10 to 100 mm.
Most caterpillars are green, but some are brown.
Most caterpillars have 10 legs.
But only have 30 legs.

TEST YOUR KNOWLEDGE

- What percentage of all the species in the world are insects?
- I make noise by rubbing my back legs with my wings. What am I?
- What insect can carry 60 times its own body weight?

ACTION STATIONS

Butterflies flap their wings approximately 20 times per second. How can you flap your wings like they are with?

PUZZLE TIME

Can you see any signs of insect life around you?
